Summary

Mount Everest Expedition/Mount Everest, the greatest challenge, is more than the most famous mountain on earth.It has a unique beauty, mystery, and mood NP

Overview

Trip Introduction

Mount Everest Expedition has unique beauty, mystery, and mood. A successful Everest expedition leaves one with the sense of being in the elite class of adventurers. It commands respect from all those who see her. Standing incredibly tall silhouetted against the shared sky of Nepal and Tibet. This mountain is Chomolungma and Sagarmatha. Whichever name one chooses, most mountaineers have the dream of reaching its summit in their lifetime. Makalu

Each climber will be accompanied by a climbing Sherpa throughout the climb, with a second Sherpa to carry a gear between the camps. From the South Col, the route ascends slopes of snow and ice to the Balcony (8500 m) on the crest of the Southeast Ridge. The climb continues up the wide ridge past rocky sections to the South Summit.

From here the route descends slightly and continues up the exposed ridge to the Hillary Step. After surmounting this 40-foot obstacle, a mixed chimney, the summit is close. Most climbers leave Camp Four sometime between 9 pm and planning to the summit by 10 am if possible. On summit day the Sherpa will carry extra oxygen for each climber. Everest

We will provide enough oxygen for the ascent. It would be budgeted as follows: One bottle for the climb from Camp Three to Camp Four, one bottle for sleeping at Camp Four and three bottles for summit day. The Khumbu Ice fall is the most technically demanding portion of the climb. Must be able to negotiate fixed lines quickly and without supervision. Skills required include the ability to and to overhanging fixed lines. A special team of Sherpa's will establish and maintain the route through the ice fall. This team will spam with ladder bridges. Above the ice fall , most of the route is equipped with fixed lines. Amadablam

Day by day itinerary
